

G&C KNOWLEDGE PLATFORM

A central knowledge base on
gender and chemicals

The Gender & Chemicals Knowledge Platform – launching mid-2026 – will serve as a central hub for gender-specific knowledge on chemicals and pollution – making it easier to access evidence, tools, and best practices for informed research, policy, and advocacy. The project, implemented by the MSP Institute with support from the Gender & Chemicals Partnership (G&CP), seeks to bring together data, research, and practical resources to raise awareness, inform policy development, and foster collaboration across sectors on gender-responsive chemicals management.

Coming soon – the platform will offer:

- Gender-specific data & research
- Guidance for policy and implementation
- Practical tools, training materials & fact sheets

Contribute and Stay Informed

We invite contributions of studies, policy resources, training materials, and other relevant tools to help build this shared knowledge base. Contact us via email to info@msp-institute.org and scan to stay connected for updates, launch news, and opportunities to engage.

This project was funded by the Federal Environment Agency and the Federal Ministry for the Environment, Climate Action, Nature Conservation and Nuclear Safety. The funds are made available by resolution of the German Bundestag.
